can happen anytime in any sports facility**

Never let our children get injured while playing.

Official Media of Sports Guards

MARCA

Worldwide Patency

Maximum protection. maximum innovation

The only system patented worldwide, designed for the fences that surrounds the perimeters of sport events and other multiple applications being a product that is 100% adaptable to the needs of the client.

This is the only system of protection used in sports complex.

The product is patented and registered in the Spanish Patent and Trademark Office (OEPM) in the Office of Harmonization of the Foreign Market (OAM) and in the Patent Cooperation Treaty in more than 150 countries...

Safety is the priority

Playing sports must be safe

Anima sport markets and installs the patented Sports Protective products worldwide. It's a product of maximum quality that is permanently preventing accidents and injuries to children and adults whenever they practice their favorite sport.

Football fields should be bounded by a fence separating amateur players from the pros. But these fences cause numerous injuries to the thousands of athletes and children who come every day to the fields. Some are life-threatening (breaks in ribs, tibia and peroneus, jaw fractures, spleen excisions, cranial trauma, etc.)

This is why sport protectors come into being. And after years of research, the best product is achieved with the purpose of guaranteeing safety in sports, and in places where children may suffer the impacts (schools, playgrounds, etc.)

Accidents-a fact

But can be prevented

In Spain, thousands of accidents occur every year, and although we can not avoid the impacts, preventive measures can be taken to considerably minimize the severity of possible damages.

Both children and adults are victims of these blows, which have even led to long-term, if not permanent, disability.

There are many dangers that must be avoided and the different structures found on the premises are very varied, some of them a real surprise because of serious threat from sharp peaks and protrusions

Andrés: 'Solo recuerdo que me daban golpes en la cara para reanimarme'

El jugador del Pontevedra B sufrió un golpe contra la valla y fue trasladado a un hospital

Andrés Perfecto tuvo un debut con el Pontevedra B que no olvidará jamás en su vida. El joven vigués, que milita en el equipo de División de Honor de juveniles, sufrió un fuerte golpe contra una valla cuando solo iban disputados siete minutos del primer tiempo tras un forcejeo con un jugador rival, en el partido ante el Meliás, en

Does not allow the proliferation of microorganisms
Non-toxic and non-pollutant.
CFCS/HCFC-free and recyclable.

CANVAS

finished with a tarp special affairs of PVC with polyester inner support.
Washable and does not absorb water.
UVA treatment.
Fire-Resistant properties.
Adaptable to sizes and contours.

As for the fences of your facility

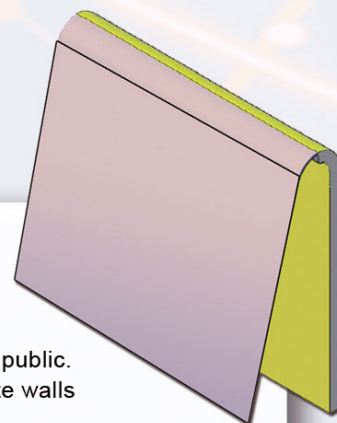

Protector type "BLANKET"

For metal sheet or concrete walls, protecting the entire surface from possible impacts and development at its top.

Protector type "HOLSTER"

To protect and aesthetically conceal the surface facing the public. Suitable for all types of fence (metal plates/sheets, concrete walls or fences with several horizontal tubes).

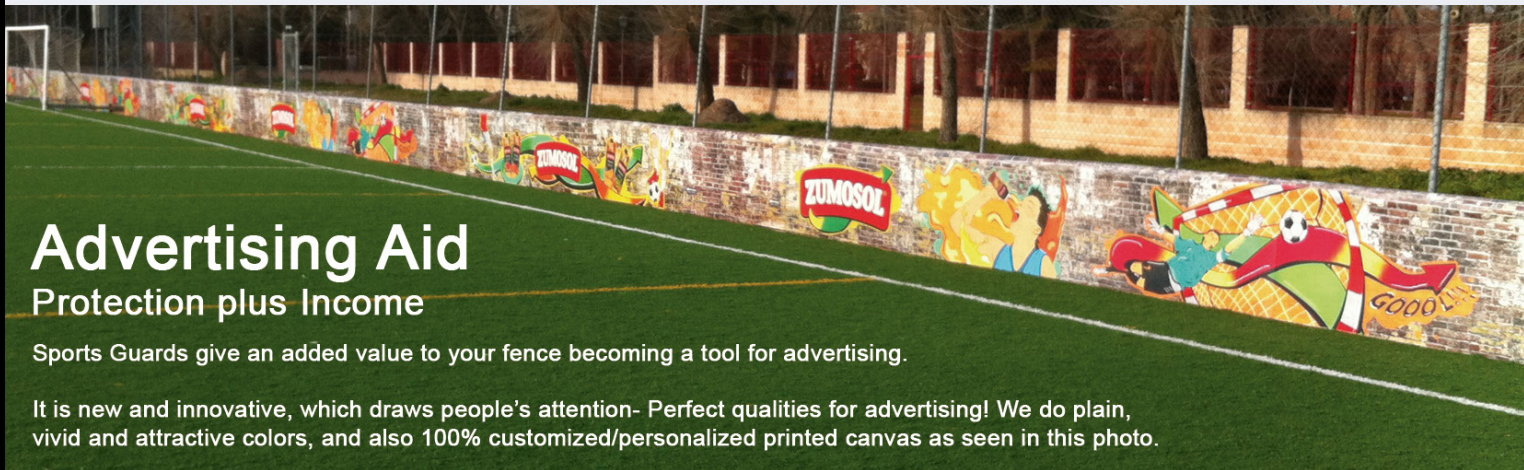

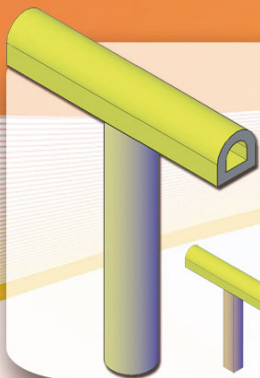

Advertising Aid

Protection plus Income

Sports Guards give an added value to your fence becoming a tool for advertising.

It is new and innovative, which draws people's attention- Perfect qualities for advertising! We do plain, vivid and attractive colors, and also 100% customized/personalized printed canvas as seen in this photo.

For "SIMPLE pipes/tubes"

PAll types of tubes (shape, material or thickness).

In some facilities there are hazards which are ignored or given less-attention such as the poles that hold the networks of the goals, and the balloons, or lamp-posts and light towers near the lines of play.

Security and Image

The best materials and the best finish

Protective Sports posts a clear message., " *Value the safety of children and athletes using the facilities*".

Your investment highlighted in this product will provide an added value that will be highly *recognized by parents and fans*.

There is a solution.
Don't let me get hurt.

Protector type "DOUBLE or TRIPLE tube"

There are fences with several horizontal tubes, that can be covered independently as seen in these pictures.

You can also consider covering the whole field with the "holster" type product..

Protector type "TUBE with CANVAS"

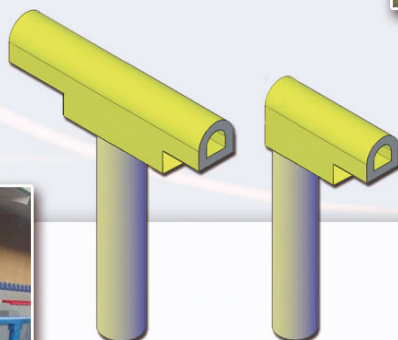

This solution allows us to close the perimeter while protecting a simple pipe fence.

EP prevents people or a football ball passing out below the tube.

SPECIAL PARTS

We dominate in the product and in the wide variety of types of fences that exist in sports facilities and in schools, knowing how to find the best solution for each particular case without losing the maximum protection and an excellent finish.

OPTIMO ACABADO ESTETICO

If there is a danger, we can fix it!

Other areas to protect in football and other sports

Sports Guards is the ideal product to protect any sports facility, as it adapts perfectly to the forms and features that are required in each one of them.

As a complement to the fences of football we have standardized the guards for Benches, sprinklers, and the Arms of the Goals folding, but there are other sports where the impact is predictable and we have protectors for this, as can be the beams of the covers in tracks, the base of the basketball hoops, the doors of paddle tennis or the walls because of its proximity to the field lines.

Base/padding(basketball)
Benches-Gyms - Sprinklers - Side goals
Paddle courts - Support beams

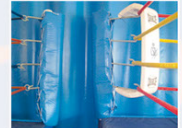

Large format canvas/roof canvass Privacy, functionality, and aesthetics

We place tarps which give privacy and aesthetic view on your facility.

We have the best professionals in the installation of large format canvas.
Roof canvass (fixed or folding (automated with control) keeps rain water from causing players to slip over.
This system keeps the game going even under extreme weathers.
No more delaying or missing games

Micro perforated Tarpaulins allow the passage of light and prevent the passage of rain and gusty winds.

Children's facilities Day-care centers, schools, parks,.....

Columns, walls, corners and a multitude of obstacles are causing children to suffer painful blows and serious injuries.

Sports Guards highly regards the vulnerability of children, therefore having the safest and best quality product for them

A child-tested product!
(a product approved by children)
